-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3-10 and 14-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Sparks et al. (3,081,038).

Sparks et al. shows a lawn irrigation system having a frame 78, fluid motor 86, sprinkler arm 50, spray tubes 62, drive wheels 24, guide wheel 24, water hose connection 42, drive gear 48 and worm screw 58, removable cover 82 in the form of a tank, hose 32 and stop mechanism defined by elements 90, 92, 94 and 98. Also note figure 6.

The lawn irrigation system shown by Sparks et al., will inherently perform the method steps recited in the method claims during normal operational use of the device.

3. Claims 1, 3-10 and 14-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Heren et al. (6,604,697).

Heren et al. shows a lawn irrigation system having a frame 202, 210, fluid motor 50, sprinkler arm 244, spray tubes 260, 266, drive wheel 14, guide wheels 18, 20, water hose connection 26, planet gears and sun gears allow the motor to be operable at more than one gear

ratio (see column 4, lines 51-56, removable cover 12 in the form of a tank, hose 28 and stop mechanism defined by elements 232, 250. Also note figure 5A.

The lawn irrigation system shown by Heren et al. will inherently perform the method steps recited in the method claims during normal operational use of the device.

Double Patenting

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 2 and 11-13 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 9, 12 and 13 of prior U.S. Patent No. 6,637,679 to Duncan et al. This is a double patenting rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Groelz, Keltner, Muench, and Schaefer, Jr. show irrigation systems in the general state of the art of the invention.
